

## Overview

Our comprehensive IT Asset Disposition (ITAD) service includes data center hardware storage, asset re-deployment, secure on-site or off-site data destruction, equipment recycling and hardware resale. Choose the services you need to fill gaps in your ITAD strategy, or let us handle the process from beginning to end.

## Customer Challenges

Whether you are in a business or technical role, below are some of the common needs and pain points we solve.

Customer Need   Pain Point	Business	Technical
Lost value in aging equipment	✓	
Data security – data bearing devices cannot leave the premises	✓	
Lost assets	✓	
Multi-location assets difficult to manage	✓	
Consistent technology refresh	✓	
Too many vendors to manage	✓	
Higher demand for faster data devices quickly making others obsolete		✓
Need for floor space, cooling, and power for newer technology		✓
Support for decommissioning gear reduces IT time for supporting the business		✓

## Business Benefits

- Single vendor solution
- Proven global solution
- Secure chain of custody processing
- Full service process from de-install, packing, transportation, erasure / destruction processing, recycling, and certificate delivery

## Key Features

Features and Description
<p><b>Decommissioning of computing devices</b></p> <ul style="list-style-type: none"> <li>• Range of devices include mainframes and large storage arrays down to end-user computing (EUC) devices (laptops, desktops, phones, etc.)</li> </ul>
<p><b>Process include hard-drive erasure and destruction</b></p> <ul style="list-style-type: none"> <li>• Certified process   Lock box services   Secure chain of custody</li> </ul>
<p><b>Devices can be repurposed, resold, or recycled</b></p> <ul style="list-style-type: none"> <li>• Recycling meets or exceeds environmental laws</li> </ul>
<p><b>Full range of services from de-install, packing, transportation, processing, and certificates of erasure / destruction</b></p>

## Differentiation

- **Ability to dispose of all ranges of computing gear**
- **Not “one-size-fits-all”** service
- **Global** coverage and topology
- **Curvature can become a “buyer” for equipment** that may have little to no value elsewhere
- **Practical and proven solutions**
- **World Class customer commitment**
- **Technology neutral** - Not dedicated to one brand
- **Proven global offering** for all IT Asset Disposition services
- **Curvature, because of its maintenance business**, can be a potential buyer for equipment that may have little to no value elsewhere
