A Park Place Technologies Company

Solid State Drives

Curvature's solid state drives are a cost effective alternative for your legacy server infrastructures.

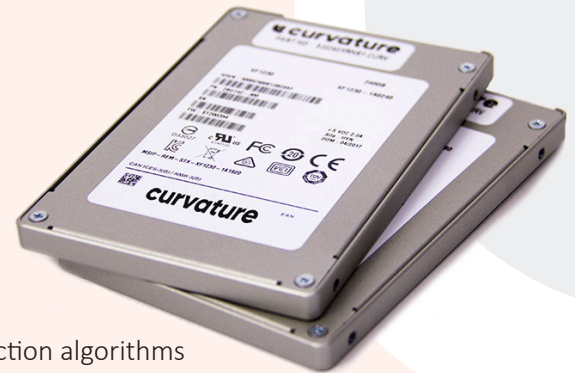

General

- ✓ 1920GB, 960GB, 480GB, 240GB Capacity
- ✓ SATA 6Gb/s interface for easy deployment in legacy infrastructures
- ✓ Consumes less than 4.3W active power across all capacities

Key Features

- Power-optimized for active workloads
- End-to-end data protection and robust error-correction algorithms
- 2 million hours MTBF and limited lifetime warranty

Curvature's Differentiation

- Best combination of capacity, endurance and low power
- Best-in-class read and write latency for faster random access
- Power-optimized for active workloads with less than 4.3W average power consumption

Best-Fit Applications

Cloud Computing
Data Centers

Data
Analytics

Web and Social
Media Servers

Data Bases
